Always in Focus, All the Time

OMNI-PLUS™

OMNI-Focus Lens
Crisp, clear, always in focus. Utilizes three lenses to view fore-, mid-, and background as one. Each camera provides 20/20 precision in all your surveillance applications.

Intelligent Motion Detection
When motion is detected in a viewing area, the lens optically zooms in up to 3X for a programmable period of time and returns back to its normal condition.

IR Remote Programming
OMNI-Plus Cameras can be programmed and customized for each application with our complimentary IR Remote. Programming is achieved from line of sight 90° from the camera.

INFINITY

Icon Driven OSD Menu
ICON Driven OSD Menu will easily guide you through programming options. Simple and fast programming.

Smart DNR (Digital Noise Reduction)
Smart DNR produces less noise and more color at night without image lagging.

WDR (Wide Dynamic Range)
Enables the camera to capture perfect images in both bright and dark environments simultaneously.

HME (Highlight Masking Exposure)
Masks overly exposed light to produce a true video image of any environment.

Star-Light (Super Low Light Technology)
Offers a slow shutter feature that increases the length of time the shutter remains open to collect additional light, illuminating typically dark environments.

Programmable Privacy Zone
When privacy is a concern, monitoring can be masked in certain zones within the scene. The user can define up to eight rectangular exclusions.

3-Axis Gimbal
Choose the exact scene you wish to view with our flexible 3-Axis Gimbal technology.

Smart IR-See what is really happening at night.
The breakdown of the video image into five zones allows for an even distribultion of the IR, which prevents excessive illumination.
