

Tampa, FL. December 5, 2013 – Digital Watchdog would like to announce the release of our brand new Starlight 960H Camera Series. The Starlight 960H cameras are top of the line, high resolution, 960 Horizontal Pixels, offering crisp and clear image with resolution of 700 TV Lines. Combined with our new low-cost high quality housings, the Starlight 960H cameras are the perfect solution to any analog system that requires the highest analog resolution on the market.

Our Starlight 960H Series is a combination of our powerful Starlight Super- Low Light technology and a 960H CCD image sensor. This combination allows our cameras to achieve higher resolution and higher sensitivity to light than conventional CCTV cameras. Our Star-Light technology offers a slow shutter feature that increases the length of time the shutter remains open to collect additional ambient light, illuminating typically dark environments. Together with the 960H CCD sensor, the camera produces a clear horizontal resolution of up to 720 TV lines.

The Starlight 960H cameras include the following features:

- › 960H CCD Image Sensor (960 Horizontal Pixels)
- › 720 TV Lines [B/W], 700 TV Lines [Color]
