Digital Watchdog® DW Spectrum™ IP VMS Course Qualifies for Seven Hours of BICSI® Credit

BICSI® Certified DW Spectrum™ IP VMS Classes are Now Available for 2015

Tampa, FL January 20, 2015– [Digital Watchdog](#) (DW™), the industry leader in digital recorders, surveillance cameras and related management software, has announced that our DW Spectrum™ IP VMS full certification class now qualifies as 7 Continuing Education Credits (CEC) by the Building Industry Consulting Service International, Inc. (BICSI®). This is applicable to installers and companies that need ongoing credits to maintain their accreditation. CEC are hours of creditable professional development education or training. One CEC hour is assigned for each productive classroom hour of formal training that pertains to the design or installation of structured telecommunications cabling systems.

The DW Spectrum IPVM Certification course is a full day training class providing students with the tools and knowledge to properly use, license and sell DW Spectrum software. The curriculum includes instruction in understanding the aspects of a video surveillance system installation, setup and all functionality of the software. The course also provides the participants basic maintenance knowledge that allows them to properly troubleshoot and support installations in the field, leading to successful implementations.

Classes are taught periodically across the country and are open for registration. [Click here](#) for more information, class schedules and to register for a class near you.

ABOUT BICSI

BICSI is a professional association supporting the advancement of the information and communications technology (ICT) community. ICT covers the spectrum of voice, data, electronic safety & security, project management and audio & video technologies. It encompasses the design, integration and installation of pathways, spaces, optical fiber- and copper-based distribution systems, wireless-based systems and infrastructure that supports the transportation of information and associated signaling between and among communications and information gathering devices.

BICSI provides information, education and knowledge assessment for individuals and companies in the ICT industry. BICSI serves more than 23,000 ICT professionals, including designers, installers and technicians. These individuals provide the fundamental infrastructure for telecommunications, audio/video, and life safety and automation systems. Through courses, conferences, publications and professional registration programs, BICSI staff and volunteers assist ICT professionals in delivering critical products and services, and offer opportunities for continual improvement and enhanced professional stature.
