

FOR IMMEDIATE RELEASE

Digital Watchdog® Expands 960H Analog Recording Line

VMAX960H CORE™ 960H Recording Solution

January 8, 2015– [Digital Watchdog](#) (DWTM), the industry leader in digital recorders, surveillance cameras and related management software, announces the release of our new VMAX960H CORE™ 8 Channel analog recorder, expanding our new VMAX960H CORE line of recording solutions. The VMAX960H CORE is an advanced H.264 embedded digital video recorder that records real-time at 960H Resolution. This DVR offers the unparalleled image quality of the VMAX960H at an affordable cost for small and mid-size applications. The VMAX960H CORE is the latest addition to our line of high quality, high resolution, 960H analog recorders that revolutionize the way users think about analog recorders.

As technology advances, security systems require solutions where details are more visible, analytical playback offers more features than play and pause and DVRs offer additional layers of data security and backup. Cost effective projects may still choose analog solutions over IP for the immediate cost savings of maintaining an existing analog infrastructure. That is why DWTM found it paramount to launch the highest quality digital video recorder family available in the market.

960H resolution offers 960 Horizontal Pixel lines in each line of resolution. The 960H resolution is 34% better than D1 resolution. Combined with DW's 960H and Star-Light MPATM Camera Series, the VMAX960H CORE provides a high resolution surveillance system using existing infrastructure and technology.

In addition to the superb resolution, the VMAX960H CORE offers strong playback and video management features that elevate this recorder compared to competing products. The DVR includes features such as quick setup and help menu for the best user experience on the market, FREE and simple DDNS, true DVR health monitoring with instant e-mail notifications on video loss and much more, all available in a simplified hardware powered by the popular DW VMAX GUI for an ultimate user experience.

Digital Watchdog Press Release

VMAX960H CORE features include:

- › 34% MORE Resolution with True 960x480 Display Recording
- › Pivot™ Central Management Software, Up to 128CH
