

DW Spectrum Version 1.5 Release

Tampa, FL April 15, 2013 – Digital Watchdog would like to announce the release of DW Spectrum version 1.5 IP Video Management Software.

The ground-breaking DW Spectrum software has been gaining momentum since it was initially released in January of 2013. Following market demand and increasing popularity, Digital Watchdog has released this software update with several new powerful features. Some of the most prominent features include a robust event, actions, and alerts engine with email notifications, mobile client for Apple and Android smartphones and tablets, and support for Windows 8 devices.

Also with this release, Digital Watchdog is proud to announce that we are making *Analog versus IP- History*. A key feature to version 1.5 is the integration of DW's VMAX Series of Analog DVRs with the DW Spectrum IPVMS. Now, the hundreds of thousands of Digital Watchdog VMAX Series DVR customers across the globe have a simple and exciting way to easily migrate their existing analog surveillance systems directly into the advanced world of HD IP and Megapixel video surveillance.

With the advancement of our analog integration, comes the exciting auto discovery feature that immediately recognizes the addition of analog cameras, either via a VMAX Series DVR or by utilizing an integrated technology partner approved analog encoder. These analog products have the ability to view live and playback via the DW Spectrum version 1.5 IPVMS. For more information on how to receive a complementary software download as well as field training, please contact your Digital Watchdog regional sales manager. Visit us at www.Digital-Watchdog.com for more details.

The DW Spectrum version 1.5 IPVMS includes the following upgrades:

- Events and Notifications
- E-mail Alerts
- VMAX Flex, VMAX480, and VMAX960H Flex & Premium analog DVR integration.
- Sensor and Alarm Output Control
- Major PTZ Control Advancements
- Support for Windows 8
- Advanced Hardware Acceleration
- Auto-Stitching for Panoramic Cameras
- Extended Camera & Encoder Integration
