

## DW Spectrum V2.0 Release

**Tampa, FL September 3rd, 2013** – Digital Watchdog is pleased to announce the release of DW Spectrum version 2.0 IP Video Management Software.

DW Spectrum IPVMS is an elegantly simple cutting edge new approach to managing HD surveillance video in the enterprise level. The hyper-optimized architecture of this new video management platform provides unlimited scalability, automated device discovery and configuration, simplified setup and ease of use, and the lowest total cost of deployment and ownership of any solution on the market today. Designed by leading professionals from the megapixel IP video industry, DW Spectrum addresses the primary obstacles and limitations of managing enterprise level HD video.

With this release, Digital Watchdog is proud to announce the incorporation of many new features including Region of Interest with SpyGlass functionality, Advanced Events and Actions upgrades such as text to speech settings and reformatted design, eMapping schematic layouts, and much more!

With the advancement of our analog integration comes the exciting auto discovery feature that immediately adds your analog cameras onto our updated cameras list with thumbnail previews, using a VMAX Series analog DVR or by utilizing an integrated technology partner analog encoder. For more information on how to receive a complementary software download as well as field training, please contact your Digital Watchdog regional sales manager. Visit us at [www.Digital-Watchdog.com](http://www.Digital-Watchdog.com) for more details.
