

DW-VMAX 3G Mobile Connection

Open your web-browser on your 3G Smart Phone and type the following:

<http://VMAX ip address or DYNDNS name/wap/> or <http://VMAX ip address or DYNDNS name/wap/index.html>

For example: <http://72.243.193.207/wap/> or <http://72.243.193.207/wap/index.html>

For example: <http://vmax8.dyndns.org/wap/> or <http://vmax8.dyndns.org/wap/index.html>

You may need to add "index.html" at the end of the URL depending on your web browser settings and properties.
Please try both URLs.

Note:

If the VMAX Web port has been changed, meaning it's not [80] the new web port needs to be added to the URL

For example: <http://72.243.193.207:8088/wap/> or <http://72.243.193.207:8088/wap/index.html>

Firmware v1.1.2.10 or higher is required
