Default Gateway: 192 . 168 . 1 . 254
Http Port: 80 (Default:80)
Streaming Port: 7011 (Default:7011, modulo 10+1)
Administrator's ID: admin
Password:

Set

Ping test

Launch admin page | Launch Main view | Restart the server

Exit

Using IP SETUP:

Searches for DWHVT units connected to the network.

Select desired DWHVT(s) that were found on the network and displays current settings.

Input custom settings and change port information.

Save settings that were changed.

Test that the DWHVT settings are correct.

Allows user to restart DWHVT remotely

Exit IP SETUP

Minimum Setup requirements for proper operation:
- Install DWHVT in desired location and connect all cables including: AC Power, network, optional microphone and external speakers.
- Remote computer is required for initial setup with a minimum requirement of Internet Explorer and TCP/IP connection.

Before you begin:
- Please remember to set your time, date and time zone prior to recording data.
- Upon powering the DWHVT please allow 45-60 seconds for the unit to initialize and show ready light on the front panel.
- A UPS is mandatory for all Digital Watchdog units.
- Keep the CD and all other accessories that are provided with the DWHVT.
- Please register your DWHVT for software upgrades, technical news, and unparalleled tech support at:

www.digital-watchdog.com/register.htm

Please visit our website for new products, contact information, news, downloads, and product specifications.
http://www.digital-watchdog.com
If you need immediate assistance, please have model and serial number of the unit ready.
Technical Support: (886) 446-3595

Quick Setup Guide
DWHVT-SERIES

DW • DIGITAL WATCHDOG
Everything's Digital

Main View

Run Internet Explorer 4.0 or higher on the user's PC, enter DWHVT IP address you want to connect to and press the ENTER key.

The first time you access DWHVT home page, the client viewer software is automatically downloaded and installed to allow you to view the MPEG4 video images. You must have the Active-X Control plug-in installed in your browser. If it is not already installed, you will be prompted to do so at this time.

The Call button initiates and ends two-way audio transmission. Going OFF HOOK rings the optional interphone device at the server end or opens the microphone in a speaker / microphone device.

The Audio button will enable or mute audio sound. The default button display is ON

The Admin button brings you to the log in screen for the Administration page for

Administrator Login
