

# DW TECH BULLETIN

DOC#: DW10082010

Distribution: Internal and External

October 08, 2010

subject: **DRC Technology**  
Dynamic Range Compressor

DRC is an advanced light compensation technology that improves camera dynamic range. In high contrast scenes, DRC automatically selects and enhances the areas that are extremely dark or bright. With DRC technology, dark spots in images particularly become more visible without overexposing the bright spots to create the one perfect image.

## MODEL NUMBERS:

D236TIR	BL5363D
D1363D	BL5363TIR
D1363D922	B1363TIR
V1363TIR	B1363D
V3363D	B1362TIR650
V3363D922	B362DIR <i>(Available in November)</i>
