

DW-MAX-II Firmware Update

- Save the file to a USB Flash Drive
- Insert the USB to the DVR
- Log in to the Menu and go to System
- Click on Upgrade (DVR should detect the upgrade)
- Click Upgrade to begin the Upgrade Process

- Once the Upgrade is complete it should ask you to reboot the DVR
- Turn the DVR off and back on (there should be a firmware upgrade progress window)
- Once the progress is complete the DVR camera window will start to load
- Log back in to the Menu and go to System
