CMS install instructions:
Download and unzip the file to your Desktop.
You should now have a folder **"[2008-01-11] NextDVR CMS 1.0.0.77 (KALTECH)"**
Go into the folder and double click "**setup.exe**"
Press **Next**, place a check in the "**I accept**" box, press **next**, press **next**, press **finish**.

How to connect to our DEMO unit:
Once installed, double click on the **"CMS Watch"** icon on your desktop.
Click **"Connection"** and type in **Demo** for the group name then click **"Add"**
Now you can put in the following info.
Name: live
Server Type: NextDVR
Network type: Lan
Address: **72.243.193.212**
Port 12000 (by default)
ID: admin
Password: (leave blank)

Click **"Add"**
Click on **"live" under "Demo"** on the left and then click **"Connect"**
Once you are connected you will see **"Live(KSR716_T)"** on the right side in the Server List.
Drag the **"Live(KSR716_T)"** icon to the first camera position and drop it.
Now you should be viewing live images from our office here in Tampa.
